

Friends -

Sorry to be the bear-er of bad news, but we are still Red for Covid color:

Our 7 day average of new cases per 100,000 is 31.8

Our  $r_t$  is good at 0.82

Our percent positivity is 12.3%

New Scott county cases on 1/1 was 82.

Following the data, definite improvement from early November; we were starting to really improve but we now appear to be getting worse again.

Peace, Becky
